

An Example ConT_EXt Lua Document (CLD)

John Gosset
July 5, 2022

1 Some Notes About This

Multiple lines of text via Lua multi-line string.

This works pretty well finally!

The proof is in the pudding.

A CLD can be converted to a PDF directly (without needing a ConT_EXt file):

```
context --forcecld my_cld.lua
```

2 Knuth

Thus, I came to the conclusion that the designer of a new system must not only be the implementer and first large-scale user; the designer should also write the first user manual.

The separation of any of these four components would have hurt T_EX significantly. If I had not participated fully in all these activities, literally hundreds of improvements would never have been made, because I would never have thought of them or perceived why they were important.

But a system cannot be successful if it is too strongly influenced by a single person. Once the initial design is complete and fairly robust, the real test begins as people with many different viewpoints undertake their own experiments.
