Contents

1   An Example Document

This is an example of using ConTEXt to format a document.

It can be exported via `org-export-dispatch` using `C-c C-e C o`.

2 Emphasis

Text can be formatted as:

- **Text can be bold**

- *Text can be italic*

- <u>Text can be underlined</u>

- `Text can be verbatim`

- `Text can be code`

- ~~Text can be strikethrough~~

3 Links

Links work!

Here is a link to example.com.

4 Tables

name	description
foo	A thing that foos
bar	A thing that bars
baz	A thing that bazs

Table 1

5   Images

6   Diagrams

7   Code Blocks

Inline code blocks work as follows:

```
import random
```

```python
foo = random.randrange(1, 11)
print(foo)
```

Included source code blocks work too:

```python
#!/usr/bin/env python3
```

```python
for i in range(3):
    print("Hello from an imported file!")
```
